

The Hydrant Solar Road Marker™

Safety And Reliability.

The Hydrant Solar Road Marker™ is engineered to provide the utmost safety and visibility. It provides fire departments with brilliant all-weather and night time hydrant identification. The Hydrant Solar Road Marker™ easily marks a hydrant location and notifies any emergency vehicle of it's location, quickly and effectively. The solar-powered Hydrant Solar Road Marker™ fully recharges in just hours and flashes in rainy, foggy, or cloudy weather. It is suitable anywhere that has a hydrant nearby.

Solar Powered!

Quick And Easy To Find!

Every Second Counts.

Finding a hydrant in an emergency is extremely important. The Hydrant Solar Road Marker™ is a highly visible, durable, reflective, raised marker sign for use in mid-road, anywhere there is a fire hydrant present. The search for a hydrant is over with the Hydrant Solar Road Marker™. It does the work for you!

Don't Take Any Chances.

When there is a fire, the speed in which the fire can be extinguished is the most important factor. The Hydrant Solar Road Marker™ is intended for fire emergency crews and was designed to pinpoint hydrants as quickly as possible. The lights provide highly effective, long-life visibility, particularly at night and in wet and foggy weather. Each unit is completely independent and self directed and will provide years of problem-free use and hydrant identification.

Did You Know?

- Every 20 seconds, a fire department responds to a fire somewhere in the United States.
- It only takes a few minutes for an entire home to catch on fire and temperatures to reach 600°.
- Each year, fire kills more Americans than all natural disasters combined.
- Direct property loss due to fires is estimated at \$8.6 billion annually.
- About 2 million fires are reported each year.
